

## S5397

### Memory Population Notice

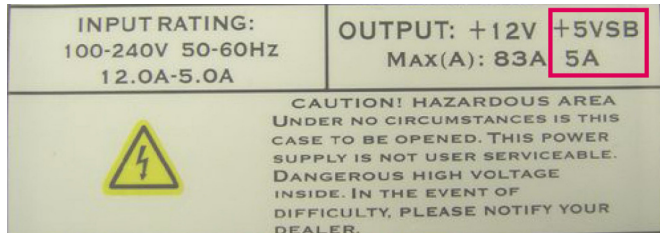

Figure 1

**NOTE:** When all 16 memory modules of 4GB or higher memory size with **IDT AMB C1 stepping** are installed in the slots, remember to check the 5VSB maximum (see Figure 1) of your power supply and make sure it is 4.5A or higher. Otherwise, the system will fail to boot up. Please refer to our web site at <http://www.tyan.com> for the recommended memory list.
